Professional Summary

Around 1 year of experience in developing User Interfaces for Mobile/Tablet/Desktop using HTML, CSS, JavaScript, and Bootstrap. Proficient in developing single-page applications (SPAs) using various JavaScript frameworks like Angular. Knowledgeable in CSS preprocessors such as SCSS and SASS, as well as front-end tooling workflows including Node.js (NPM) and Webpack. Additionally, skilled in functional testing to ensure high-quality user interfaces and applications.

Education

Aditya Engineering College, Surampalem
Bachelor's Degree in Computer Science.

June 2015 – May 2019

Experience

Software Engineer | LearningMate Solutions | Mumbai

March 2022 – December 2022

- Skilled in performing functional testing of web applications to ensure end-to-end system functionality aligns with business requirements.
- Developed and executed detailed test cases, test scenarios, and test scripts to validate application features and ensure smooth functionality.
- Integrated RESTful APIs using Elastic Search to optimize data retrieval and indexing, improving search functionality and overall application performance.
- Utilized the RxJS Observable library to manage asynchronous HTTP requests, efficiently handling multiple values over time.
- Wrote unit test cases for Angular applications using Jasmine and Karma.
- Utilized AJAX and JSON to send requests and responses between the client and server, ensuring efficient data storage and exchange across browsers and servers, while maintaining smooth website functionality.
- Managed tasks using Jira and facilitated cross-team collaboration in Scrum meetings.
- Worked in Agile development environments, actively participating in Scrum ceremonies like daily standups, sprint planning, and retrospectives, adapting to dynamic project requirements and collaborating effectively with cross-functional teams.
- Collaborated with backend developers to integrate and consume REST APIs, ensuring seamless data flow between the frontend and backend, and worked with version control tools like Git for efficient project management.

Projects

Pairup

- Pair up is at the forefront of matchmaking technology by providing an app that allows users to discover new connections depending upon their respective preferences.
- **Technologies Used:** Angular 5, ASP.NET CORE, Azure, Web API, SQL Server, Jasmine, Karma, Selenium and Protractor.

2U

- The project is about creating a future-proof teaching and learning ecosystem that allows the design and delivery of content across multiple delivery channels.
- **Technologies Used:** Angular 9, ASP.net, Azure, SQL, DevOps.

Technologies

Web Technologies: HTML, CSS, SCSS, Bootstrap, AJAX, jQuery, JSON.

Languages: JavaScript, Typescript.

JS Frameworks: Angular 7/9.

Version Control System: GIT, BitBucket.

Debugging Tools: Jasmine, Karma, Selenium.
