Bachelor in technology in CSE from Aditya engineering College (2019).

Key skills:

- **Web Technologies:** HTML, CSS, Bootstrap, AJAX, jQuery, SCSS, JSON.
- **JS Frameworks:** Angular 7/9/11
- **Programming Languages:** JavaScript, TypeScript.
- **Version Control System:** GIT, Bitbucket
- **Debugging Tools/Testing:** Karma, Jasmine, Protractor.
- **IDE:** Visual Studio Code.

Work Experience:

Learning Mate Solutions Pvt Ltd

March 2022 – December 2022

Project Title : 2U
Position : Software Engineer
Team Size : 15
Client : K-12 Education

The project is about creating a future-proof teaching and learning ecosystem that allows the design and delivery of content across multiple delivery channels.

My responsibilities include:

- Used AJAX, JSON to send requests to the server to check the functionality of the websites and for storing and exchanging information between browsers and servers.
- Integrating APIs by using elastic search
- Building reusable components that could be utilized in different locations throughout the application using a variety of custom directives in Angular 9.
- Working experience in Agile development environments, familiarity with Scrum processes, and ability to adapt to changing project requirements and priorities.
- Familiar with Angular 11 features, contributing to the enhancement and maintenance of the application.

Mind trail Technologies Pvt Ltd

November 2020 – March 2022

Project Title : Tambla
Position : Associate Engineer
Team Size : 7
Client : Tambla

Worked as a associate Engineer. This project is a web-based application that will allow the user to analyze and monitor safety, environmental, and quality issues within the workplace.

My responsibilities include:

- Creation of an efficient design and development of user Interaction screens using HTML, SCSS, Bootstrap, JavaScript, Angular 7 and Node JS.
- Enhanced application performance by Angular 7 Component based development in view of the future.
- Utilized NPM scripts for build and test environments in a Node.js application.

Technologies Used: Angular 7, Asp.net Core, Web API, SQL Server, Angular Material.

2.Project: [Pair up](#)

worked as a Associate Engineer. Pair up is at the forefront of matchmaking technology by providing an app that allows users to discover new connections depending upon their respective preferences.

Technologies used: Angular 5, ASP.NET CORE, Azure, Web API, SQL Server, TDD, Jasmine, Karma, and Protractor.

My responsibilities include:

- Development of UI pages using Angular 5, HTML5, CSS3, JavaScript, Prime NG and Bootstrap.
- Using Angular 5 to develop single page applications.
- Using NgRx for managing Angular applications.
- Implemented HTTP requests using RxJS Observable library to handle multiple values over time.
- using Angular Material for designing and implementing consistent and visually appealing UI components
